

# Types and the Basics

There are 7 types in TypeScript:

- boolean: `var isDone: boolean = false;`
- number: `var height: number = 6;`
- string: `var name: string = "bob";`
- array: `var list:number[] = [1, 2, 3];` also  
`var list:Array<number> = [1, 2, 3];`
- enum: `enum Color {Red, Green, Blue};`
- any: `var notSure: any = 4;`
- void: `function hello(): void { console.log('hello'); }`
